

SIMRAN SINGH

Java Developer | Full-Stack Web Development (Growing Focus)

singhanchal33141@gmail.com | 6306418046 | [LinkedIn](#) | [GitHub](#) | Portfolio

OBJECTIVE

Computer Science undergraduate with a strong foundation in Java software development — OOP, backend systems, and database integration — and a growing focus on full-stack web development. Building REST APIs with Spring Boot and expanding into HTML5, CSS3, JavaScript, React.js, and Node.js. IBM- and Deloitte-certified, with project experience spanning backend systems, desktop software, and data analytics. Seeking an internship to learn from experienced engineers and contribute to real-world Java and web development work.

TECHNICAL SKILLS

- Core: Java, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)
- Java Frameworks & Tools: Spring Boot, JDBC, Swing (Java GUI)
- Database: SQL, MySQL
- Web Development (secondary focus): HTML5, CSS3, JavaScript, REST APIs
- Currently Learning: React.js, Node.js, Express.js
- Other Languages: Python
- Data & AI (supporting skillset): Pandas, NumPy, Power BI, Streamlit
- Dev Tools: Git, GitHub, IntelliJ IDEA, VS Code, Eclipse

FEATURED PROJECTS

Distributed Rate Limiter — Java, Spring Boot, Redis, Lua [\[GitHub\]](#)

- Built a production-grade distributed rate limiter exposed through a Spring Boot REST API, implementing Token Bucket and Sliding Window algorithms.
- Used atomic Redis Lua scripts to prevent race conditions across multiple server instances.
- Validated with JUnit 5 and Mockito; containerized with Docker.

Bank Management System — Java, Swing, JDBC, MySQL [\[GitHub\]](#)

- Built a desktop banking application with a Java Swing GUI connected to MySQL via JDBC.
- Implemented account creation, deposits, withdrawals, balance enquiry, and PIN management using OOP principles.

Personal Portfolio Website (Web Dev) — HTML5, CSS3, JavaScript [\[GitHub\]](#)

- Designed and built a fully responsive multi-page portfolio from scratch using vanilla HTML5, CSS3, and JavaScript.
- Implemented scroll-based reveal animations, a typing-text hero effect, an image lightbox gallery, and a mobile-responsive nav menu.

DeepThought Lead (Data Analytics) — Python, SQL, Power BI, Pandas [\[GitHub\]](#)

- Built a business intelligence dashboard turning raw lead data into KPIs and conversion insights.

Additional data analytics & AI projects — India Climate Twin, AI Crop Health Detector — on portfolio.

EDUCATION

KIPM College of Engineering and Technology — Gida, UP

B.Tech, Computer Science & Engineering | CGPA: 8.45 | 2024 – 2028

Zenith Convent School — Gorakhpur, UP

Intermediate — 90% | 2023

Matriculation — 92% | 2021

CERTIFICATIONS

- IBM SkillsBuild Spring Certification Program 2026 — Data Analytics | IBM SkillsBuild | March 2026
- Data Analytics Job Simulation | Deloitte (via Forage) | October 2025
