

SIMRAN SINGH

Aspiring Software Engineer | AI Enthusiast | Data Analytics

singhanchal33141@gmail.com | 6306418046 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

OBJECTIVE

Computer Science undergraduate passionate about building intelligent, real-world software across AI-powered applications, Java systems, and data analytics dashboards. Certified by IBM and Deloitte, with hands-on project experience spanning machine learning, backend engineering, and business intelligence. Currently seeking an internship to learn from experienced engineers and contribute to impactful projects.

TECHNICAL SKILLS

- Programming Languages: Java, Python, SQL, JavaScript
- Web: HTML5, CSS3
- Core CS Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)
- AI & Data Analytics: Artificial Intelligence, Pandas, NumPy, Matplotlib, Power BI, Microsoft Excel, Streamlit
- Database: SQL (MySQL), JDBC
- Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code, Eclipse, Swing (Java GUI)

EDUCATION

KIPM College of Engineering and Technology | Gida, UP 2024 – 2028
B.Tech – Computer Science & Engineering | CGPA: 8.45

Zenith Convent School | Gorakhpur, UP 2023
Intermediate | 90%

Zenith Convent School | Gorakhpur, UP 2021
Matriculation | 92%

FEATURED PROJECTS

India Climate Twin — Python, AI, Streamlit, Leaflet [\[GitHub\]](#)

- Built an AI-powered climate intelligence platform to visualize weather conditions, environmental data, and predictive climate insights.
- Designed an interactive dashboard with location-based analytics using Streamlit and Leaflet maps.
- Simplified complex climate data into an accessible, responsive interface for everyday users.

Distributed Rate Limiter — Java, Spring Boot, Redis, Lua [\[GitHub\]](#)

- Developed a production-grade distributed rate limiter implementing Token Bucket and Sliding Window algorithms.
- Used atomic Redis Lua scripts to prevent race conditions across multiple server instances.
- Exposed functionality via a Spring Boot REST API; validated with JUnit 5 and Mockito, with Docker support.

AI Crop Health Detector — Python, AI, Streamlit, OpenCV [\[GitHub\]](#)

- Built an intelligent agricultural platform that detects crop diseases through image analysis.
- Delivered AI-based recommendations and a user-friendly dashboard to support farmer decision-making.

DeepThought Lead — Python, SQL, Power BI, Pandas [\[GitHub\]](#)

- Created a business intelligence dashboard transforming raw lead data into actionable insights.
- Built interactive visualizations for lead quality, conversion opportunities, and KPI monitoring.

Bank Management System — Java, Swing, JDBC, MySQL [\[GitHub\]](#)

- Developed a desktop banking application simulating account creation, deposits, withdrawals, and balance enquiry.
- Integrated MySQL via JDBC and implemented a clean Swing GUI demonstrating OOP principles.
